

SystemOne®

Your integrated HME business management solution.

Integrated, Modular Approach to HME Management

Choose SystemOne for managing inventory, handling third-party billing, and processing orders. It manages every aspect of your business from accounts receivable (AR) to point-of-sale (POS), shipping, rentals, sales, and more. It has a modular design, so you can select only the functionality you need, then add to it as your business grows.

"QS/1 makes it easy to grow. It is easy to learn, but once you start growing your business, if you want to add something, they have the product. They make everything you want. They have it all."

Faster Routine Tasks

Avoid duplicate data entry – just enter patient, doctor, carrier, and item information once. Create claims and update inventory and accounts receivable from a single order entry. Capture signatures electronically in the store or field for HIPAA and credit cards and apply to multiple documents.

Medicare and Accreditation Compliance

Print all Medicare-required documents, and meet Medicare requirements for assignment for benefits, ABNs, delivery tickets, physicians' orders, and CMNs.

POS and AR

Integrate touchscreen POS to provide inventory control, payment processing, and all required compliance for front-end retail. Use AR to collect payments, view patient and insurance carrier balances, send statements, and print reports.

Comprehensive Reporting

Flexible, simple, and comprehensive reporting, including custom-designed reports, lists, and exports. Customize and save multiple versions of more than 70 standard reports.
