# QS/1 | Mevesi®

# Business intelligence software designed for pharmacies.

Created for community and institutional pharmacists' needs, Mevesi intelligent analytics unifies prescription, claims, inventory, and other data into a single view. Quickly and clearly visualize your pharmacy's operational performance, drug margin analyses, and revenue trends so you can make better business decisions.

Key Features:

Dashboards

High-level visuals display almost real-time business performance.

Scorecards

Compare business metrics at a glance from day-to-day, month-to-month, and year-to-year. See prescription revenue, existing and new business, and organic growth.

Analysis Reports

Use pre-built, detailed reports to drill down to individual transaction records.

Custom Reports

Easily tailor reports to pull specific metrics and use the event scheduler to automate them.

Additional Features:

- Aggregates real-time metrics from existing data such as prescription, drug pricing, and accounting.
- Breaks down prescription revenue, new business, organic growth, and existing business.
- Facilitates forecasting, margin evaluation, inventory control, and operations monitoring.
- Easily compares store to store.
- Monitors trends and highlights anomalies.
- Shows inventory in real and future time to enable timely adjustments.
- Offers reports on non-compliance to help boost medication adherence.

Benefits:

- Unifies all your pharmacy data into an easy-to-understand view.
- Turns your pharmacy's existing wealth of data into information you can do something with.
- Identifies anything that could be hurting operations and adjustments that could boost pharmacy performance.
- Backed by a team that's proud to offer collaborative, responsive, and tailored support.
